1) 
$$f: \mathcal{U}(a) \rightarrow \mathbb{R}$$
 u  $\lim_{x \to a} f(x) = 0$ . Floys

 $f(x)$  naporbaram sux. wason you  $x \to a$ .

2)  $f: \mathcal{U}(a) \longrightarrow \mathbb{R}$  a  $\lim_{x \to a} f(x) = \infty$ . Floys

3) 
$$f: \mathring{u}(a) \rightarrow \mathbb{R}$$
 u  $g: \mathring{u}(a) \rightarrow \mathbb{R}$ .  
Easi  $\forall x \in \mathring{u}(a)$   $f(x) \in C \cdot g(x)$ ,  $rge \in C \in \mathbb{R}_{+}$ ,  
mo numym  $f(x) = O(g(x))$  vym  $x \rightarrow a$ .

4) Eau bein. 
$$f = O(g)$$
 u  $g = O(f)$ , mo  $f$  u  $g$ 

Chabullum (ognow napigea)  $f \approx g$  upu  $x \rightarrow a$ 

5) Eau 
$$f(x) = \varphi(x) \cdot g(x)$$
 u  $\varphi(x) \xrightarrow{x \to a} 1$ , mo  $g(x) = g(x) \cdot g(x)$ 

6) Eau 
$$f(x) = \varphi(x) \cdot g(x) \cdot u \cdot \varphi(x) \xrightarrow{x \to a} 0$$
, mo nucuym  $f = 0(g)$  upu  $x \to a$  (7.e.  $f - \delta e c x$ .

3) 
$$\lim_{x \to \infty} x \sim x \sim ty \times x \sim e^{-y} \quad (x \to 0)$$

4) 
$$\frac{1}{x} \sim \frac{7}{x+1} (x \rightarrow \infty)$$

$$5) \times^{3} = O(\times) (X \rightarrow \infty)$$
